Welcome to Royal HaskoningDHV

Engineering Enhanced Societies

You don't often realise that the work of engineers can be found so close to you. Switch on a light, travel to work, drink a clean glass of water...

Behind that are the world class solutions our engineers come up with, making lives a little better and brighter.

We are proud of our work and our projects. Our professionals work worldwide, from 100 offices in 35 countries in the fields of aviation, buildings, industry, energy and mining; infrastructure; maritime and waterways; planning and strategy; rivers, deltas and coasts; transport and asset management and water technology.

We are committed to working with our clients and partners to find innovative sustainable solutions to today's world challenges.

That is our promise - enhancing society together.
